

Fill Forever

Carry tap water with you.
Light on price. Light on the environment.

Innovative Concept

This bottle is of an exclusive EPAL design, made in Portugal, 100% reusable and recyclable.

Profile inspired by a waterfall, narrower at the top and broad at the base, giving it greater stability.

Elegant, understated and sophisticated, it is designed for you to carry EPAL water wherever you go!

Where to buy

- EPAL Headquarters
- Barbadinhos Steam-powered Pumping Station
- Mãe d'Água das Amoreiras Reservoir
- Águas Livres Aqueduct

EPAL

Grupo Águas de Portugal

Drink EPAL water, water of excellent quality!

Light on the environment

- Weighs only 27.5 g, produced in PET (does not contain phthalates or bisphenol-A) with optimised consumption of materials and energy
- The neck and cap contain 40% less material, so are kinder to the environment
- H₂O symbol printed without the addition of labels and glue, making it a more environmentally friendly choice

Correct use and maintenance

- Protect from sunlight
- Wash regularly
- Change the water every day
- At the end of its long useful life, the bottle should be deposited in the yellow recycling bank.

EPAL water is strictly monitored and treated, subject to over a thousand tests a day and complies with Portuguese and European legal requirements.

Chemical Composition in the city of Lisbon's water mains	Average Value	Parametric value Decree-Law 306/2007 of 27 August
pH (E. Sørensen)	8	≥6,5 and ≤9
Conductivity (µS/cm at 20°C)	187	2500
Chloride (mg/l Cl)	18	250
Fluoride (mg/l F)	0,14	1,5
Nitrates (mg/l NO ₃)	2,2	50
Sulphates (mg/l SO ₄)	21	250
Sodium (mg/l Na)	17	200
Potassium (mg/l K)	1,4	-
Calcium (mg/l Ca)	19	-
Magnesium (mg/l Mg)	3,3	-
Total hardness (mg/l CaCO ₃)	61	-

Analyses performed at EPAL's Accredited Laboratory (Central Laboratory).
EPAL performs approximately 300,000 analyses annually in its Water Supply system.
